

## A 30-YEAR HEAD START FOR BIOLOGICALS SOLUTIONS

Jord BioScience is helping advance science and analytics spanning genomics, ecology, and phenotyping, to deliver next generation crop inputs. Founded on 30+ years of deep microbial science for agriculture, Jord accelerates high-performing microbial products.

Unlike chemistry, biological products thrive through precise microbial partnerships within cropping systems. Our bespoke multifunctional inoculants empower leading agribusinesses to accelerate R&D and enhance product performance.

## POWERED BY NATURE, THE JORD MICROBIAL BANK ACCELERATES INNOVATION AND ROI

The Jord Microbial Bank, developed over 30 years, is a premier collection of 6,500+ microbial isolates from agriculturally relevant ecosystems, spanning diverse geographies, habitats, and soil chemistries. Cataloged by their ability to signal, enhance, protect or promote distinct modes of action, it accelerates product discovery for groundbreaking innovations.

## THE RIGHT MICROBE MAXIMIZES

*Discovery, Speed, Consistency and Value*

### THE JORD BIOLOGICAL PLAYBOOK

- Matches right microbial partner to enhance, improve and extend product performance
- Applicable to all product categories and application modes, and compatible with conventional agrichemicals
- Leverages novel modes of action, without genomic modification

*Increasing Performance*

**40%+**

BIOPESTICIDE  
ACTIVITY

**25%+**

BIOSTIMULANT  
ACTIVITY

**15%+**

BIOFERTILIZER  
ACTIVITY

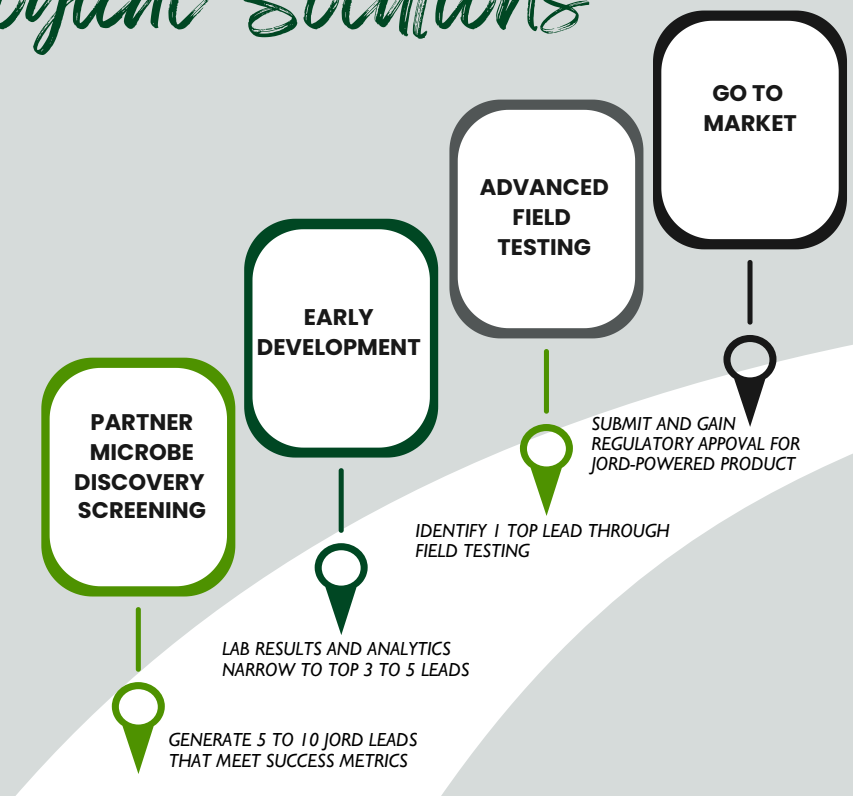

***Over 100 years of combined experience in microbial science, agricultural product development and commercial collaborations***

# Fast-tracking Biological Solutions

## SPEED TO LEAD

From product concept through commercialization, Jord BioScience fast-tracks novel product development to maximize value and results in today's competitive marketplace. Product leads are generated in 2-10 months.

## Proven Results

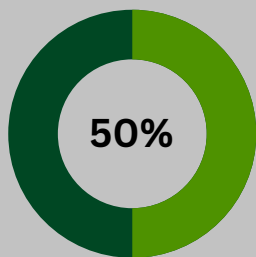

### IMPROVED SOY BIOFUNGICIDE

Jord BioScience enhanced performance of a leading commercial microbial product delivering better consistency across environments and improved yield performance.

#### Discovery to Field Trials

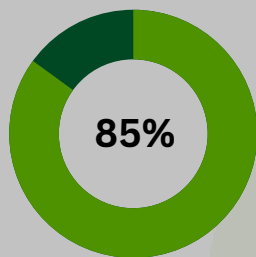

#### JORD'S PARTNER MICROBE IMPROVED PRODUCT CONSISTENCY
